

"My goal has been to produce the finest cut-off saws and scanners that can be manufactured. I believe our machines are second to none."

LeRoy Cothrell

HIGHER YIELDS

Ultimizers has led the industry since the mid-1980's with higher yields and high value optimizing. We constantly strive to improve recovery and reduce waste through modern technology.

SERVICE AND GUARANTEE

Ultimizers has an unsurpassed service record of assisting our customers and keeping their equipment up and running. We guarantee our products and stand behind them!

PANEL WIDTH OPTIMIZER

The Ulti-Sizer Scanning System Quickly measures random width strips and provides panel build-up solutions for high speed panel glue-up operations or for operations needing solutions for wide panels.

Ulti-Sizer

PANEL WIDTH OPTIMIZER

Scanning is based on line lasers at high angles being read from USB based array cameras. As many as 34 staves are measured at any time for each panel solution. Final solutions within +/- 0.50" up to 40" wide panels. The final stave groups are kept together and fed to a customer supplied glue wheel.

MADE IN THE USA

Ulti-Sizer

PANEL WIDTH OPTIMIZER

Heavy duty air operated stops resist dust and debris while maintaining quick and consistent operation.

Chain driven gravity rolls drive the strips to and from the stop and scanning area. Rollers are grouped very closely together for parts down to 9" long. As many as 15 panels a minute 14" long can be achieved.
